

RUSSIAN IP TRANSACTION CENTER

Russian IP Transaction Center Transaction No.

Certificate

№ 0770-291-645

**Framio Engine – программа расчёта несущих элементов
мезонинной конструкции на колоннах**

Item type:

Computer program

Rightholder:

As of 07.06.2026 14:13:07 (MSK)

Rightholder: Frolov Andrei Evgenevich.

Author(s): Frolov Andrei Evgenevich.

File hash:

5aa9318988f31bff7a419dc38

4525ed4c3d7774531d47cdd

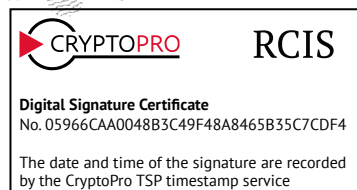

55ccaf66444f2e07

Date of registration in Russian
IP Transaction Center:

07.06.2026 14:12:51 (MSK)

Date created:

05.04.2026

The IP item is registered through Russian IP Transaction Center node:
National Register of Intellectual Property

RUSSIAN IP TRANSACTION CENTER

Intellectual property is a cultural value and a key asset of modern economy

Russian IP Transaction Center Certificate is the document confirming registration and circulation of IP rights, including scientific and technical ones, in the Russian IP Transaction Center public-state blockchain network¹.

Russian IP Transaction Center, a public-private blockchain network, is a single digital registry uniting business and state

Information entered into the registry is confirmed and stored by all its participants, Russian IP Transaction Center nodes, independently. The nodes are the following: the Federal Service for Intellectual Property (Rospatent), accredited organizations for collective rights management, the Moscow Innovation Cluster, the Skolkovo Foundation, the Intellectual Property Court, major creative, technology companies and corporations together with other IP market players, representing both business and government entities. Full list of the Russian IP Transaction Center public-private blockchain network nodes is available at <http://сеть.рцис.рф/services>

Digital market based on Russian IP Transaction Center infrastructure
